

Problem E1003

Problem Index

A lot of the lifts use the following way to display number. Each number is represented by 7 lines of asterisk and space. Each line consist of 6 characters. For example the number 8 is represented in the following way.

```
*****
*      *
*      *
*****
*      *
*      *
*****
```

Print the numerical part of our problem index 1003 to the screen using above method. Between each two numbers, print 2 space to separate them.

Sample Output

```
*  *****  *****  *****
*  *        *  *        *
*  *        *  *        *
*  *        *  *        *  *****
*  *        *  *        *
*  *        *  *        *
*  *****  *****  *****
```
