

## Problem F1201

### String and Integer

You are given two integers  $a$  and  $b$ . Try to store them in both string and integer variable. Then try the  $a + b$  operations for two different data types. What are the differences?

#### Input

The input consist of 2 lines,

Integer  $a$  is on the first line.

Integer  $b$  is on the second line. Each of the two integers is between 1 and 100 inclusive.

#### Output

Output the result of string concatenation on the first line.

Output the result of integer addition on the second line.

#### Sample Input 1

12

34

#### Sample Output 1

1234

46
